COLORING EXISTING POOLS IS EASY

Re-energize your pool setting with a simple change to an Aqua/Lamp Rainbow Rays LED bulb! If your pool already has the regular Aqua/Lamp 12-volt system, then adding color is as simple as changing the bulb. Color change is activated simply by turning the same on/off light switch you already have unless you want to add the convenience of a remote control switch.

RAINBOW RAYS™

RAINBOW RAYS™

A Spectrum of Choices

Colouring Your Existing Pool Is Easy with Aqua/Lamp's Rainbow Rays™ Led Bulb

Re-energize your pool environment with a simple change to Aqua/Lamp's Rainbow Rays™ LED bulb! If your pool already has the regular Aqua/Lamp 12- volt pool light system (the majority of inground pool owners in Canada have one), adding colour is as simple as changing a light bulb. Colour change is activated simply by turning the same on/off switch you already have unless you want to add the convenience of an Aqua/Lamp remote control switch which gives the pool owner the ability to control the pool lighting from a favourite lounge chair or even from inside the house.

Aqua/Lamp's Rainbow Rays™ LED lights operate without moving parts for longer longevity. LED bulbs last up to 10 times longer than regular bulbs, use only 20 watts of energy and are as easy to operate as flipping on a light switch. Aqua/Lamp's Rainbow Rays™ LED light can provide individual colours in blue, white, green, pink and turquoise and the light gives a transition of colours and a strobe as well.

Jason Sorokin, President of Consolidated Pool and Spa Industries Inc. is excited about this technology that his company is able to offer pool owners. "Most pool owners in Canada likely have the Aqua/Lamp Pool Light system which has been the number one pool light choice of Canadians for the past 15 years," says Sorokin. "Any owner with an Aqua/Lamp pool light system can upgrade to colour simply by changing their existing light bulb to the new Aqua/Lamp's Rainbow Rays™ LED bulb available," adds Sorokin. This system of lighting is the number one choice of building experts, dealers and owners and is the most affordable method of adding colour to your pool in North America.

Backyards need not be in black and white any more and Aqua/Lamp's Rainbow Rays™ bulb is now available to offer every pool owner the ultimate in backyard enjoyment with all the colours of the rainbow to create the mood and atmosphere for every occasion!
